# What is the Hot Shot Method?

This method allows us to clean your personal identifiers online directly with bureaus, send your letters quicker by using the credit bureaus' electronic delivery system, better known as their backdoor, and your letters will be sent certified whenever we send correspondences to the entities furnishing your information to the credit bureaus. This method allows us to expedite the process so you can see results sooner. The Hot Shot Method is also good if you are a victim of identity theft.

**We will challenge all discrepancies each round.**

## IDENTITY THEFT

If you are a victim of fraud or identity theft, please upgrade your chosen commitment to our Hot Shot Method. You may be a victim of identity theft if you have personal information, inquiries, or accounts reporting you don't recognize or have knowledge of opening.

## Certified Letters

To show the seriousness of the matter at hand, to ensure your letters were received, and to make sure our matters are handled in the timeframe allotted 30-day timeframe. We get better results from debt collectors when letters are sent certified.
